

VEE bicycle rack

Sometimes a small detail is enough to make the cityscape perfect. Vee is a unique and striking bicycle rack that allows you to lock both the wheel rim and the frame.

The longer loop supports the bicycle frame and the shorter loop keeps the front wheel firmly in place fixed, excluding the bicycle frame scratches.

The finishing is available in powder coating as well as with an innovative elastomer coating.

FEATURES

A bicycle rack with a very unique design lets you lock your bike both by the wheel rim and by the frame.

Perfectly sized loops secure the rim without scratching the bicycle frame.

Rack construction made out from 6 mm hot-dip galvanized steel is extremely durable and corrosion resistant.

The innovative elastomeric cover protects the bicycle frame from scratches.

EXTERY quality without compromise- harmonious design, carefully selected materials and engineering considered to the last detail.

MATERIAL

The onstruction is available in hot-dip galvanized steel which meets the ISO 1461:2009 standard.

Hot-dip galvanized steel

Elastomer
