

NOVE

Slanted surfaces and structural contrasts give Nove a modern, dynamic look. The refined and finished design, despite its bold shape, looks unpretentious and fits in many different environments. The roof of the trash does not allow rain to fall inside and the angle of the roof does not allow the litter to be left on the waste bin.

The combination of two different colors helps to bring out the characteristic details on the frame and corpus, which makes the Nove even more unique.

Design by Sven Sörmus, iseasi

Nove

FEATURES

The 6 mm thick hot-dip galvanized and powder-coated steel frame makes the product resistant to even the harshest environmental conditions.

The front panel of the bin has a stainless steel cigarette extinguishing plate and a removable cigarette but cup mounted on the inside of the door.

A polished concrete plinth, as part of the design, makes a trash can heavy enough to leave the product free to stand if desired.

Thanks to the raised body of the bin, the snow is easier clean and the door will open freely even if there is more snow than usual.

Emptying: opening with a triangular key. Inside is a removable metal container for garbage. The door locks when closed.

EXTERY quality without compromise- harmonious design, carefully selected materials and engineering considered to the last detail.

EXTERY

MATERIAL

Hot-dip galvanized and powder coated sheet metal corpus and 6 mm thick metal frame. Metal frame galvanization meets the ISO 1461:2009 standard.

RAL recommendation by designer:

- Frame

RAL 7016

RAL 9005

RAL 8017

RAL 9007

RAL 6034

- Corpus

INSTALLATION

Free-standing on a firm base

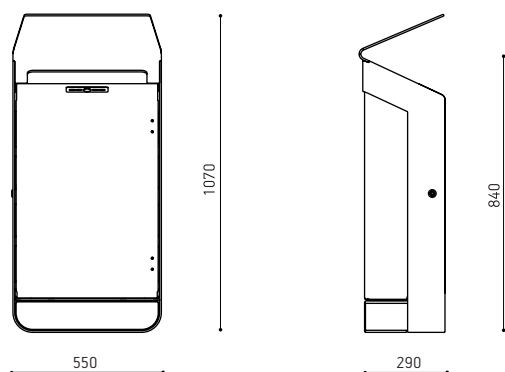

Anchored to a firm foundation

EXTRAS

Anti-graffiti coating - we offer the possibility to cover the waste bin with anti-graffiti coating. The anti-graffiti coating is repellent to the new color and makes the surface of the product very easy to clean.

DIMENSIONS

Nove waste bin - **NOVC100**

Capacity: 100 l

Material marking in product code:

G- anti-graffiti coating

The use of the legend on the example of anti-graffiti coating: **NOVC100-G**
